27TH JANUARY, 1988.

Dear Sir,

REPORT OF AN UNIDENTIFIED FLYING OBJECT

A. **DATE, TIME AND DURATION OF SIGHTING**

9TH DECEMBER, 1987 AT 17.05 AND 17.10 HRS.
FOR APPROX. 3 MINUTES DURATION.

Section 40 sounds like an aircraft to me. Is this one of our natural B'ham airport ranges?

B. **DESCRIPTION OF OBJECT** ONE LARGE, STEADY BRIGHT LIGHT WITH FIVE SMALLER OVAL WHITE LIGHTS ALONGSIDE IN LINE ABREAST FORMATION, FOLLOWED ALONG BY TWO SMALL WHITE LIGHTS ACCOMPANIED BY A LOW PITCHED ROARING SOUND.

Section 40 22/2

C. **EXACT POSITION OBSERVED** THE FIRST SIGHTING WAS SEEN TO APPROACH FROM CANNOCK AT A HIGH ALTITUDE, PASS OVERHEAD AND GRADUALLY DISAPPEAR FROM VIEW AS IT TRAVELLED TOWARDS LICHFIELD. THE SECOND SIGHTING WAS EXACTLY THE SAME BUT WAS NOT SEEN AS IT APPROACHED BUT SEEN AS IT WENT OVERHEAD.

D. **HOW OBSERVED**

NAKED EYE.

E. **DIRECTION IN WHICH OBJECT WAS FIRST SEEN**

DESCRIBED AS TRAVELLING IN A STRAIGHT UNIFORM PATH AT SPEED FROM CANNOCK TOWARDS LICHFIELD.

F. **ANGLE OF SIGHT**

VIEWED LOOKING VERTICALLY UPWARDS.

SIGHTING OF UFO OVER RAF NEWTON

Please find, attached, a copy of a report received from one of the Cpl's based at RAF Newton regarding the sighting of UFOs in the Nottinghamshire area which is enclosed for your information.

You will wish to know that many national newspapers carried reports of a very large UFO over Nottingham on that night.

We appear to have ten reports which relate to this sighting. The object travelled from Notts through to Staffs then to Suffolk. Things and reports appear to fit together. Do we know of any rational explanation which could account for this flying football pitch?

SIGHTING OF UFO OVER RAF NEWTON

On Wednesday the 9th Dec 1987, around 1710 hrs I had just locked Bld 29, Supply Flt, and was carrying out an external security check. While carrying out my check, on the barrack stores side of supply, my attention was drawn to a large formation of lights in the sky.

The lights were in two lines. The front line being larger than the rear line. They were about a mile apart, the rear line being slightly off set. I would estimate that there was between 12 to 16 lights in the front and 8 to 10 in the rear, outside lights being red, inside lights white, all being of equal distance from each other. They appeared in the north west and headed towards the south east.

I noted that there was too many lights for a large transport aircraft and moving too slow for fast jets. The speed of the formation was slow, more of a glide, when the formation was directly above me I heard jet engine noise, but not very loud, if there was a number of aircraft involved.

Two or three minutes later I noticed a second large formation. I thought it was odd seeing two large formations, one after the other.

The formation was smaller than the first, but with the same sequence of lights, the outside being red and inside white. I counted these lights - 8 in the front line and 4 in the rear line. The rear lights not so off set as in the first formation. The lights were also of equal distance apart, same speed and heading in the same direction. There was also jet engine noise when the formation was directly above me. A minute or so later the formation banked to the east keeping perfect formation.

I did not think any more about what I saw because of the engine noise, thinking it was a large formation of aircraft. I mentioned it to my wife when I got home and on Thursday morning I mentioned it to Cpl [redacted] who was in the Guardroom on Wednesday evening who said that the Nottingham Police had rang asking if we had any aircraft flying at the time, because of reports of UFOs from the Public.

Cpl Section 40 gave me the Policeman's name which was [redacted] PC Section 40 [redacted]. I rang PC Section 40 [redacted] on Thursday evening when I got home and told him what I saw.

Spoke Duty Officer, UK RAOC on 8/1, and asked for him to ring Section 40 in the evening, as I was having trouble contacting him. He will try and will let me know results on Monday 11/1. However, he doesn't hold out much hope of obtaining the video as he seems to remember that the camera was held by a witness who didn't know Section 40 (and vice versa). UKRAOC rang on 11/1. MINUTE SHEET

Subject

SIGHTING OF UFO's

Station: HOLMFIRTH Date: 10 December 1987

Sub-Divisional Officer, Holmfirth

The attached statements relate to sightings of a flying object which was of such a nature that it was not readily identifiable. It was seen at approximately 6.55 am on Friday,27 November 1987.

The first informant is a Section 40, an Section 40 Section 40 of Section 40 Holmfirth. He was driving a motor vehicle along Section 40 Netherthong towards Huddersfield Road when he observed a very brilliant spherical ball of white light motionless in the sky. It appeared to be 200/300 feet above the hill line at Farnley Tyas and was 1/2 miles away from him. It remained in position for 2/3 seconds, then moved slowing before accelerating at a tremendous speed creating a pinky orange firetail. It plummeted earthwards and dropped out of view behind the horizon. It was within his view for 10/20 seconds. Section 40 has drawn a sketch plan identifying the location.

The second informant is a Section 40, who is also a Section 40 (at the same premises as Section 40 of Section 40 Section 40 Almondbury, Huddersfield,who was waiting on foot in Southfield Road, Almondbury, when he saw a very bright round white light. It was moving when he saw it but not creating any noise and was only in view for 2/3 seconds.

Weather conditions were good in that it was a clear sky with dawn breaking although it was cold and frosty.

The incident was not reported at the time but statements have now been obtained and I ask that they be forwarded to General Administration at Headquarters for onward transmission to the Ministry of Defence, Duty Controller, Aeronautical Information Services (Military) R.A.F., West Drayton.

No Press enquiries have been received.

STATEMENT OF WITNESS

(C.J. Act, 1967, s 9, M.C. Act, 1980, s 102, M.C. Rules, 1981, r 70)

I live at the above address and I work at Section 40

Section 40 Birkby, Huddersfield.

At exactly 6.58 am on Friday, 27 November 1987, I was driving my Mini Metro Vanden Plas motor car along Deanbrook Road, Netherthong, towards the direction of Huddersfield Road. May I say I know it was this time because I had just glanced at the car clock as I was waiting for the News headlines on the car radio at 7 am.

I ducked down slightly in the car in order to turn my car radio on. I did this and again assumed normal driving position and as soon as I did this I saw straight ahead of me above the hill - horizon, a very brilliant spherical ball of white light, the object or whatever it was at this time was motionless in the sky.

I would say that the 'object' was some 1 or 2 miles away from me and appeared about 200/300 feet above the distant hill line, the hill line I refer to is the hills at Farnley Tyas which are to the right of Castle Hill as I was looking at it.

I continued to drive down the road at a slow speed, keeping my eyes on the object. A few seconds later I saw the object begin to very slowly move to the right in a horizontal plane and then it suddenly accelerated at a tremendous speed in the same direction as before. This created a pinky orange firetail which filled the length of my windscreen. At the very last moment, it suddenly

veered in a downward path as if plummeting towards the earth and I suddenly thought, it's going to crash into the village of Stocksmoor, it gave that impression anyway. The object went out of my view behind the hill line and that's the last I saw of it. I would say I watched it in total for about 10/20 seconds.

I can say that for certain it wasn't the light from the top of Castle Hill, I could see this clearly also.

I am also certain that it wasn't a shooting star.

I feel quite sure having seen it that it wasn't just an inanimate object. It must have had some programming or intelligence to make it move in the way it did.

I cannot describe it further from where I was other than a ball of light, and in no way whatsoever was it an aeroplane.

The time in question when I saw the object was a very clear cold frosty morning with dawn just breaking. The sky was a very pale blue.

Having thought about the matter since, I feel that I ought to mention a felling I have had concerning the object and its possible reason for its stationary position when I first saw it and that is it appeared to be almost directly between the paths of two Transmitter masts. The first being the large Emley Moor mast and the second one is a small booster mast located in a field just right of Upperhag Road.

To assist I have drawn a rough sketch of the scene and area I have stated. I have signed the sketch at the bottom right hand corner,

Dated the 9 day of December 19 87 [redacted] Section 40

STATEMENT OF WITNESS

(C.J. Act, 1967, s 9, M.C. Act, 1980, s 102, M.C. Rules, 1981, r 70)

At 6.55 am Friday, 27 November 1987, I was waiting in Southfield Road, near my house, for a friend to attend in his car to collect me for work. I was looking down Southfield Road, my friend drives up when he collects me, and over towards Lepton Edge which against the sky line forms the nearest horizon.

My eye was suddenly caught by a very bright round object, having the intensity of white light of a car about 50/100 yards away, shining white in colour. It travelled from my left towards my right in front of me and seemed to dip to the right as it went over the horizon. The horizon at this point I know to be about one mile distant from where I was stood. Altogether I saw the object about 3/4 seconds before it disappeared from sight.

It actually appeared to have been travelling in a line from somewhere over and above and behind my left shoulder to a point above and in front of my right shoulder as I was looking out, it travelling left to right but away from me at the same time.

There was no sound at all all as it passed or anything else other than it being a bright round white light. From where I was stood it was only just clearing the houses on the horizon left to right before it disappeared over the horizon.

The height of the object would be similar,I would guess to that of a light aircraft rather than a jet, perhaps ½/¾ mile up.

[redacted] Section 40

Statement taken by:

PC [redacted] Section 40

Telephone numbers and witness availability to be endorsed overleaf.

STATEMENT OF [redacted] Section 40 .....
Continued:

The object had a steady constant speed as it moved across the sky. When I first saw the object appear at my left hand side field of view, I would say it was half way towards the near horizon, say about half a mile away, I only noticed it looking down the road, it looked as though it would have come into view from behind houses to my left hand side and out into the open sky.

The weather conditions at the time were clear, I could see other stars in the sky against the darker background with dawn still not breaking.

The only real landmarks around Huddersfield area, or near Almondbury, would be the Emley Moor TV Mast. The object would be heading somewhere to the left hand side of Emley Moor Mast (Wakefield side) and it passed.

I have an ex-service background, in that I was in the Royal Navy from early 1942 to 1946 working on Minesweeping and later Aircraft Carrier on general and technical duties and finishing as Steward.

I had no Flight or Air Traffic type training just purely Navy work. I mentioned it to the man that picked me up for work but he hadn't seen anything.

Whilst at work that morning, I found that someone at work had also seen the same or similar thing that I had seen. I didn't know he had reported it until the Police contacted me about it, via our Works Personnel Department.
